Your Clinic
Hearing Center

Dear Patient,

We want to update you on some very exciting wireless accessories now available for pairing with your Phonak hearing aids.

Phonak RemoteMic: *Don't Miss a Word.* The new Phonak RemoteMic picks up a speaker's voice from the source and transfers conversation between you and the speaker up to 60 feet away! This accessory is ideal for conversations in noisy restaurants or listening to a speaker in a noisy, crowded room. Lightweight and tiny in size, the RemoteMic is a life-changer for those who need added ease of listening and speech clarity in challenging listening environments. Used with the Phonak ComPilot, the RemoteMic is compatible with all wireless Phonak Hearing aids.

Phonak TVLink S* is specifically designed to work with your television set. You can use the TVLink S to directly transmit your favorite television program to your hearing aids without affecting the volume for other people enjoying the same program.

We're hosting a special "Wired for Sound" Technology Demonstration for the week of [MONTH XX-XX]. Call now to schedule your appointment to see how the wireless technology works and the terrific added benefits you'll experience.
