

Take This Simple Test

A hearing loss may be holding you back from life!

Check all that apply

- ☐ Do you ask people to repeat themselves?
- ☐ Can you hear but not understand some people?
- ☐ Are you missing key words of a conversation when in a noisy area?
- ☐ Does your family think the TV/radio is too loud?

If you have checked “yes” on any of the boxes, you should have your hearing tested. See below to schedule your appointment!

be amazed!!

Introducing Zoom

Amazing hearing technology that does what our own ears can't.

How many times have you been at a large get-together or noisy restaurant struggling to hear that one person's voice?

Phonak Zoom Technology decreases the background noise and lets you focus in on the people you want to hear, even in the most challenging of noisy environments.

Our own ears can't do that.

Always connected.
Anywhere, every time.

With Phonak hearing devices you can wirelessly connect with telephones, televisions, MP3 players, and many other communication and entertainment systems using Phonak accessories.

Ask us about Phonak ComPilot and TVLink S.
